United Kingdom

## sea Commercial WORK Marine Conference

The Seawork Commercial Marine Conference combines two half day conference sessions and is a must for all involved in the commercial marine industry who wish to explore the challenges, changes and emerging opportunities in today's and tomorrow's commercial marine and workboat sector.

### Morning session

The morning session focuses on USVs. Estimated at \$US470m, the unmanned surface vessel market is expected to reach around \$US1billion by 2022. USVs can augment and even replace divers in salvage, port security, fish farm surveillance, bridge and dam monitoring, research and education. This session will benefit any business that serves these sectors by helping them keep on top of the latest developments.

### Afternoon session

With businesses looking to improve efficiency, deliver on environmental policy and cut costs hybrid looks to be the perfect solution. The question is, how do we apply it in the commercial marine sector. With inconsistent run times and variable sea conditions the afternoon session will open discussions on the drive for change and how hybrid can be implemented successfully across the commercial marine and workboat sector.
